# The Wisdom of Mythology

**Series Presenter: Professor Terry Doyle**

Terence Doyle is Emeritus Professor in the Department of Medicine at University of Otago.

Now retired from active medical practice, he is currently Society of Apothecaries

of London Lecturer in History of Medicine at University of Otago.

For many years, Terence was Professor of Radiology and Head of Department of Radiology in Dunedin. Professionally Terence had many strings to his bow but he was probably best known for establishing breast imaging in the southern region. He led a highly successful pilot programme for mammographic breast screening in the region.

He specialises in presenting History of Medicine and Science in interesting ways, with a range of lectures extending from the Classical period to the Modern era.

His research interests focus on the Early Modern and Eighteenth Century periods; particularly the Latin works of Francis Glisson and the archival material in the Monro Collection at University of Otago.

### Introduction
